EDUCATION

University of Maine at Augusta, Augusta, ME

Graduated: May 2026

Bachelor of Science: Computer Information Systems, Software Engineering Concentration

GPA: 3.9

Georgia Institute of Technology, Atlanta, GA

Starting: Fall 2026

Online Master of Science in Computer Science

SKILLS & CERTIFICATIONS

Languages: Python, JavaScript, SQL, PHP, Java

Frameworks: React, FastAPI, Bootstrap

Tools: Git, Docker, Linux, OpenCV, MediaPipe

PROJECTS

ThrowLogic, *Founder and Developer*

January 2026 - PRESENT

- Built a full-stack computer vision platform for automated discus throw analysis and coaching
- Developed React frontend and FastAPI backend for athlete video review and coaching workflows
- Implemented pose tracking and feature extraction pipeline using OpenCV and MediaPipe
- Trained RandomForest model for phase detection using pose features and user-validated data
- Integrated OpenAI API to generate structured coaching feedback and actionable recommendations

Redistricting Analysis Research Project, *Student Researcher*

April 2026 - PRESENT

(with Professor Matthew Dube, University of Maine at Augusta)

- Applied graph theory and data science techniques to analyze electoral district structure and demographic change
- Developed Python workflows for processing geographic and demographic datasets
- Modeled geographic units as graphs to evaluate district fairness and structural characteristics

EXPERIENCE

Ames Rollins Technologies LLC, *Co-Founder & Full-Stack Developer*, Southport, ME

March 2025-PRESENT

- Built and deployed full-stack web applications and software products for businesses and organizations
- Developed frontend interfaces and backend services using PHP, JavaScript, SQL, and Bootstrap
- Implemented Git-based deployment workflows for automated application releases to production servers
- Delivered production software solutions for 5 client organizations across Maine

Tyler Technologies, *Technical Services Intern*, Yarmouth, ME

May 2025-PRESENT

- Resolved 600+ software and system cases through debugging and technical analysis
- Executed SQL scripts and validated database changes during application deployments
- Troubleshoot application, database, and network issues in production environments

LEADERSHIP & ACTIVITIES

President, UMA E-Sports Club

2024-PRESENT

Captain, Varsity E-Sports Team

2022-PRESENT

President, Student Government Association
